## SUMMARY

A passionate and innovative Android Developer with extensive experience in building, testing, and publishing applications on the Google Play Store. Skilled in the latest Android technologies such as Kotlin, MVVM, Hilt, Dagger, Clean Architecture, and Jetpack Compose. Adept in full-stack development, including front-end design and back-end integration, with a strong background in various programming languages and web development platforms. Proficient in using Git for version control, ensuring seamless collaboration and code management.

## EXPERIENCE

### Freelance Android Developer (Graduation - Present)

- Designed, developed, and published the modern application 'Caption Maestro' on the Google Play Store, utilizing AI models like GPT and implementing the latest Android trends.
- Worked with clients to create customized applications, including API integration for blog content retrieval and juridic document access.
- Utilized Kotlin, MVVM, Hilt, Dagger, Clean Architecture, and Jetpack Compose for robust and scalable application development.
- Managed code versions and collaboration using Git version control system.

### Software Development Technician Intern, Ministry of Justice (1 Month)

- Collaborated with the Ministry of Justice to develop a system for interacting and retrieving juridic documents like commercial registers.
- Gained hands-on experience in real-world development scenarios, working closely with governmental processes and requirements.

### Graduate Project Developer

- Successfully built and presented an Android application as a graduate project, leading to the acquisition of a diploma in Software Development Technician.

### WordPress Developer

- Developed WordPress blogs and stores for clients, implementing SEO techniques to enhance search engine rankings.
