Summary

As an experienced Flutter developer, I have built professional-level mobile applications and **continuously improved my skills** with each project. I have expertise in implementing **BLoC**, **MVVM**, **MVC** architectures, integrating **APIs** and **third-party libraries**, integrating **Firebase** services. My dedication to creating user-friendly and scalable **UI** designs has helped me deliver successful projects.

Project history

Clone Alpha IPTV application   15/02/2023

I developed an IPTV clone app that enables users to stream live TV channels, series, movies, and on-demand content.

- I used to decrypt data from APIs response. Initially as **AES-256-CBC** and the encryption was changed to **XOR encryption**, during the project building.
- For this project, I followed the **MVVM architecture** pattern to ensure **scalability** and **maintainability**.
- The client requested a design that is **100% identical** to the original app, and I was able to meet this requirement while still delivering a professional product.
- The project was completed within a **nine-week timeframe**, and still need updates meantimes.

Infinity ***   24/08/2022

I also developed a private social media app (made specifically for interaction between a specific community).

- Built using **BLoC pattern** architecture, ensuring it **promotes separation of concerns**, which can save time and effort during dev.
- Features included but not limited to **user profiles**, friend requests, messaging, **sharing media content**, comment and **interact** with posts, also with features such as **map-based location detection** and other functionalities.
- This project took a total of **ten-weeks** to complete.

e-Pièce   25/03/2022

E-Piece is an e-commerce mobile application in the field of car spare parts. We developed this app using Dart Flutter and the Laravel.

- We follow the **MVC architecture** pattern.
- The app features an intuitive user interface, allowing users to **easily browse**, **search** and **purchase car parts**, **order tracking**, and **user management** functionalities.
- The app was developed in a **professional manner**, it took approximately **12 weeks** to complete.

Career Summary

Professional Experience:

- Engaged with PRO-STUDENTS, is a Tunisian startup, and the TDN-BOOTCAMP freelance project, in 2020.

- Professional internship with MediaNet in mobile development in the summer of 2022.

- Employment with Sierra Business Intelligence company as a Flutter developer since February 2023.

Association Experience:

- Media Manager and vice president at "The Musketeers Clubs for Networking and Communication" from 2019 to 2021.

- Marketing Manager at the Career and Competence Certification Center of ISET Bizerte from 2020 to 2022

Education summary

Studying career:

- Bachelor's degree in Software Development, Web and mobile from ISET Bizete (the Higher Institute of Technological Studies of Bizerte) in Jully 2022.

- Cloud Development certificate with COFAT Group in 2021.

Entrepreneurial career:

- Two years of engagement in the Student-Entrepreneur Pole Carthage PEEC (2020 -> 2022).

- Completion of various training programs.

- Learned the process of creating a start-up.

Ennakl Services Manager
01/07/2022

I developed a management app for after-sales services for Ennakl, the official Volkswagen dealer in Tunisia, as an internship with MediaNet. This application helps users to schedule appointments and manage their services for their cars using their car's serial number.

- We follow the MVC architecture pattern.
- I utilized Firebase as a lightweight backend to handle database and other related services.
- The app has similar functionalities as the attt.com website for car appointment in Tunisia.
- The project was completed in four-weeks.

Professional skills summary

Hard Skills

- Proficiency in Dart programming language
- Knowledge of Flutter framework and its widgets
- Experience in using third-party libraries and APIs
- Understanding of software design patterns (e.g. BLoC, MVVM)
- Familiarity with version control systems (e.g. Git)
- Knowledge of agile development methodologies (e.g. Scrum)
- Understanding of RESTful web services and JSON data interchange format
- Graphic design, Cloud developing...
- Working with Github
- Working with Trello / Jira
- Basic knowledge using Adobe Xd.

Soft Skills

- Communication skills
- LeaderShip
- Resource management
- Problem-solving abilities
- Time management skills
- Adaptability and flexibility
- Attention to detail
- Teamwork and collaboration
- Creativity
